International Student
Science Association

About

Intro

International Student Science Association (ISSSA) is a non-profit organization dedicated to empowering and connecting high school students from around the world who have a passion for scientific research. Through collaborative projects, mentorship programs, and networking opportunities, we aim to cultivate the next generation of innovative thinkers and problem solvers.

Mission

Our mission is to inspire and support young scientists in developing their research skills and fostering a love for scientific exploration. We strive to create an inclusive community that celebrates diversity and encourages collaboration across various scientific disciplines. ISSSA aims to provide a platform for high school students to build academic networks with peers, engage in meaningful research under guidance, and contribute to the advancement of science globally.

Vision

Our vision is to establish ISSSA as the premier international organization that empowers high school students to become leaders in scientific research. We envision a future where every student has access to resources, mentorship, and opportunities to explore their scientific interests, regardless of their background or geographical location. Through our collective efforts, we aspire to improve the world, promote sustainable development, and contribute to the well-being of all humanity through scientific advancements.

Reasons for joining

Hands-On Research Experience: ISSSA members gain practical experience and deeper understanding in various scientific research disciplines.

Networking and Mentorship: ISSSA provides a strong network of peers and mentors for support, guidance, and potential collaboration opportunities.

Skill Development and Leadership Opportunities: ISSSA enhances critical thinking, problem-solving, communication, teamwork skills and offers leadership opportunities for personal and professional growth.

Contribution to Global Causes and Personal Growth: ISSSA members contribute to global causes, foster personal growth, self-discovery, and express unique scientific ideas in a supportive environment.

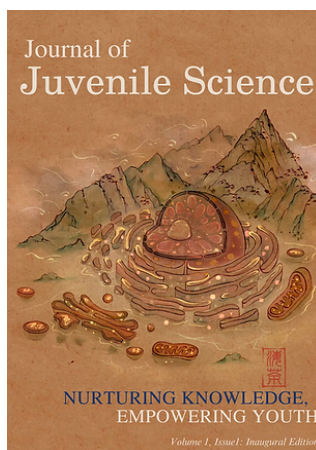

Enhanced University Applications: ISSSA membership showcases commitment to scientific inquiry, global collaboration, and personal growth, enhancing university applications.

Journal

Journal of Juvenile Science is the official publication of the International Student Science Association (ISSSA), supported by Committees, members, and mentorships in the scientific community. The journal is dedicated to showcasing popular science essays and research papers in various scientific fields, highlighting the innovative work of young researchers from around the world.

With a focus on fostering cross-cultural collaboration, the journal welcomes submissions that explore the intersection of different scientific traditions and methodologies. All articles undergo a rigorous peer-review process in blind to ensure the highest standard of

quality. In addition to research articles, the journal also features book reviews, providing valuable insights into the latest developments in scientific literature.

This is an OA journal, when an article is accepted for publication, the author/s will not be charged any Article Processing Charge (APC). The final version of the published article is then free to read for everyone.
